**The Original Healing Salve-** A natural and arguably more effective alternative to Neosporin will soon be FDA approved!

Puremedy's Original Healing Salve has been healing infections, skin conditions, and chronic wounds for over a century. We are proud to say that the FDA has recognized the power of this medicine in a time of crisis - as a solution to the global pandemic of Antibiotic Resistant Microbes (superbugs).

## So what makes this salve so special?

**Our proprietary blend of pine and fir tree extracts!** We believe that nature gives us all of the tools we need to heal ailments, and to live healthy, happy lives. Equally important, we believe that science is crucial, and that it must be explored in order to understand natural remedies, and how to utilize them best. We have seen hundreds of examples of how this salve has healed injuries from minor cuts/burns to chronic wounds, gangrenous tissue, infections, and so much more.

It is our responsibility to provide science based evidence about our healing salves, which is why we have invested in over a dozen in vitro laboratory studies which **prove** that it kills the full spectrum of gram positive and gram negative bacteria including the superbugs MRSA and Klebsiella.

Superbugs currently kill about 2 million people globally every year. By 2050 that number will be conservatively 10 million people, probably more. We are quickly approaching a time when we will not be able to use antibiotics anymore. Let that sink in. This is the exact reason that the FDA is seeking alternatives in integrative medicine, such as the Original Healing Salve. Nothing else is working! Neosporin, the most well known antibiotic first aid ointment actually adds to all of this because it prevents the body from building natural immunities. Bacteria has found a way to live in the presence of this ointment by mutating into the superbug MRSA, which is completely resistant to antibiotics. Our salve can stop it.

This very salve is well on it's way to being approved by the FDA, and we whole heartedly predict that Puremedy will play a **BIG** role in combatting superbugs and the global resistance to antibiotics. Our owner, Joni Siegel flew to Washington D.C. to present to the FDA why The Original Healing Salve should be classified as a drug. The response was more than we could have asked for. She made life long connections, and gained support from professionals in the medical field. The FDA has contacted us on a few occasions since, so we hope to be approved any

It is our goal to heal humanity with pure ingredients, not synthetics. It's time to go back to what our ancestors taught us so long ago.

**“I've used Puremedy's Original Healing Salve with hundreds of my patients and they all received incredible results”**

**- MATT, PHD**

day now! It is our mission to make this salve available to everyone on the planet who needs it. While doing so, we vow to remain true to our calling by using only the finest, 100% certified organic or wild harvested, food grade ingredients, and we will always advocate for the rights of animals with absolutely no animal testing.

Puremedy is more than a brand, it is a lifestyle. Look around you. All that is natural has the power of healing the mind, body, and soul.
